HSA Seed Money – LifePath Systems will contribute \$41.67 per paycheck, up to a total of \$1000 per year, for each employee enrolled in the HDHP+HSA medical plan.

SIMPLIFYING THE HDHP AND HSA RELATIONSHIP

The High Deductible Health Plan (HDHP) is designed to create a balance between contributions and the cost of the deductible. While paying lower premiums for your HDHP, you can put those savings into your Health Savings Account (HSA).

Employees can contribute into a Health Savings Account (HSA) on a pre-tax basis and use the funds to help pay for eligible medical expenses as well as deductibles, prescriptions, vision, and dental care.

LifePath Systems also contributes to participant's HSA!

Employees enrolled in the HSA can utilize contributions to pay for today's health care, prepare for tomorrow's health care uncertainties, or save for retirement.

Funds roll over from year-to-year, which means you accumulate more over time between your pre-tax contributions and the contributions from LifePath Systems each year. The longer an employee can invest in an HSA, the more he or she can take advantage of the tax incentives and interest that incurs in the account.

HSAs are owned by the individual and goes with the employee should she/he leave the company. It can be moved into another HSA or transferred to a similar account.

Beginning the sixth day of absence for the same event, available EI hours may be used as long as a note from a physician is provided to document medical eligibility and expected date of return to work.
